EDUCATION

Georgia Institute of Technology

Atlanta, GA

Master of Science in Computer Science: Human-Computer Interaction, GPA 4.0

Expected Dec 2027

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science, GPA: 3.6

Dec 2025

- *Relevant Coursework:* Data Structures & Algorithms, Object-Oriented Programming, User-Interface Design

EXPERIENCE

IBM

Aug 2026 – Dec 2026

Incoming Software Development Engineer Co-op

San Jose, CA

Adobe

May 2026 – Aug 2026

Software Engineer Intern

San Jose, CA

- Building machine learning-driven risk detection infrastructure to prevent fraud across Adobe's commerce services

SitScape

Jun 2025 – Aug 2025

Software Engineer Intern

McLean, VA

- Engineered a “**Generative UI**” system with a **multi-agent AI** ReAct service using LangGraph/LangChain in Python that automates front-end UI and event handling, reducing developer **build time by 75%**
- Shipped a no-code **RAG API**, enabling **10+ Fortune 500 clients** to deploy **LLM-powered chat** in production
- Authored comprehensive documentation on both services for use by team of **30+ developers**
- **Skills:** Python, LangGraph, LangChain, Flask, JavaScript, SQL, OpenAI API

Georgia Tech Sonification Lab and Design Studio

Aug 2024 – Present

Graduate Research Assistant, Software Development

Atlanta, GA

- Built data visualization systems leveraging Highcharts, accommodating high-stakes climate communications tailored to **5+ accessibility profiles** (e.g., colorblind, low-vision, screen reader users)
- Implemented a JavaScript **ETL pipeline** to process **2,000+ geospatial entries** of hurricane and climate data
- **Skills:** Python, JavaScript, Highcharts API, GeoJSON, HTML, CSS, Figma

Datamaxx Group

May 2024 – Aug 2024

Software Engineer Intern

Tallahassee, FL

- Reduced user identity verification time by **67% (1 min to 20s)** by developing an automated ID parsing and user face verification service in ASP.NET with AWS Textract and Rekognition API
- Enhanced user security screening efficiency for **100+ vendors** by implementing a QR code visitor check-in system
- **Skills:** C#, ASP.NET MVC, jQuery, HTML, CSS, SQL, AWS API

PROJECTS

Dryft Notes | *React Native, Python, Scikit-Learn, LangChain FAISS, Supabase, Flask, OpenAI API*

- Built a cross-platform (Web/iOS/Android) note-taking app that visualizes user notes in an interactive network graph using clustering (**TF-IDF + KMeans**) and vector embeddings
- Designed an agentic note cluster summarization feature using OpenAI API to generate concise overviews

Multi-Agent AI Email Assistant | *Next.js, Flask, Python, LangGraph, LangChain, OpenAI API, Google API*

- Built **4 ReAct subagents** and a **supervisor agent** to triage inbox, reducing email processing time spent by **74%**
- Cut manual follow-up time by **60%** by drafting context-aware responses and prioritizing incoming emails

AI Academic Search Engine | *Next.js, React.js, Python, LangChain FAISS, Flask, Pandas*

- Engineered a **RAG pipeline** that enables semantic search in **< 2s per query** for academic research papers
- Enabled vector search for **200M+ abstracts**, designing **10+ REST** endpoints for query processing

TECHNICAL SKILLS

Languages: Java, Python, C#, C, JavaScript, SQL, MySQL, HTML, CSS, TypeScript

Technologies: React.js, Next.js, Flask, FastAPI, Scikit-Learn, ASP.NET, Pandas, LangChain, JUnit, jQuery, D3.js

Developer Tools: Git, Docker, Visual Studio, Android Studio, AWS Amplify

Design/Visualization Tools: Figma, Adobe Photoshop, Tableau
